(54) INFORMATION PROCESSING TERMINAL CONTROL SYSTEM, CONTROLLER AND INFORMATION PROCESSING TERMINAL

(57)Abstract:

PROBLEM TO BE SOLVED: To properly time control an information processing terminal without the necessity of a direct contact between a user and a controller via telephone.

SOLUTION: A CPU 101 in a front terminal 10 checks the control table in a memory 103 and if there exists a KARAOKE(a sing-along machine) terminal 30 which is to be completed within five minutes, a completion notifying information is transmitted through a communication line 102. If no answer is received from the terminal 30 and the completion time is passed, a completion process is executed. On the other hand, if an answer is received and a request is made to extend the completion time, an extension time selection information is transmitted and if a response is received, the completion time in the table is accordingly updated.

LEGAL STATUS

[Date of request for examination] 09.07.2003

[Date of sending the examiner's decision of rejection] 07.11.2006

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

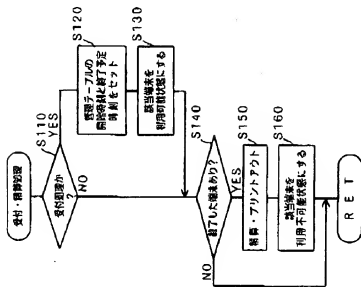

[Date of registration]

[Number of appeal against examiner's decision of rejection]

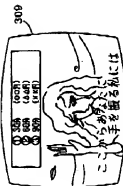

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
